

Is Your Place Protected?

A safer Cabarrus with your help

Join the Protected Places Program to foster a safer Cabarrus for everyone.

We're at our best when we feel safe. Safety is the constant that we all need to thrive. It enables the things we care about most to flourish, from our families and communities, to our businesses and economies.

Register your business and provide crucial information to your local public safety agency in order to help keep your business and people safe. As a Protected Place, you'll play an important role in increasing the safety of your community.

Why become a Protected Place?

Decrease crime at your location

The program works to both prevent crime and solve crime faster through community partnership with public safety.

Enhance response in case of an emergency

The more first responders, police and other public safety personnel know about your location, the more informed their emergency response can be.

Prevent criminal activity

When criminals know your business has video security in place, they are 300% less likely to target your location. (Source: ADT)

Protected Places in action

- 1** An entry is breached overnight and items are stolen at a Protected Places location.
- 2** The local public safety command center views the security camera footage and captures a clear snapshot of the burglar.
- 3** The suspect is quickly apprehended within 24 hours of the incident and the stolen items are recovered.

Transforming Cabarrus, one camera at a time

Find the right person in hours versus weeks

Decrease the time to case closure

Fewer stop and searches in the community

How is my privacy protected?

Privacy is crucial to maintaining trust and transparency. You decide how any data and video is accessed. All information remains confidential and secure.
